## Who I am

I help companies create and execute strategies that identify assumptions and reduce risks.

I do this from a ‘full-stack’ perspective, bringing many skills to the table: website optimization, analytics, SEO, marketing, forecasting, psychology, programming & web development, and of course, strategy and execution.

These diverse skills allow me to see the big picture and navigate complex challenges.

My ideal environment is fast-paced, working with people who are intelligent, passionate, and empowered by leadership. I fit best in small to medium-sized companies that have a passion for delivering value.
